

Number bonds

Mrs. Maneli would like Lerato to learn her addition number bonds. Help her to identify the numbers bonds for numbers up to 7. Addition number bonds are addition facts.

Lerato has done the first one for you.

Addition number facts are the addition sums that make up a certain number. So what sums make 6? Model this starting with 0. $0+6$, $1+5$, $2+4$, $3+3$, $4+2$, $5+1$, $6+0$. What do you notice about $0+6$ and $6+0$? They are the same numbers but are written differently. When learners are more familiar with number facts - play games - my turn - your turn. For 6: Teacher says 6, learners say 0.
