

Sharing

Help Lerato to figure out these problems. Draw a picture in order to help. Divide (or break up the picture or pictures into the number of pieces). Look at how Lerato worked out this sum.

Sipho Peter Thabo Jake

Sipho Peter Thabo Jake

= $\frac{1}{2} + \frac{1}{2} + \frac{1}{2} + \frac{1}{2}$

1 There are 12 boys in the class. There are 6 cupcakes. How much does each boy get?

2 There are 3 pizzas but there are 9 children at the party. How much pizza does each child get?

Numbers, Operations and Relationships

CAPS
Grade 3 Term 2

Sharing leading to fractions. Solves and explains solutions to practical problems that involve equal sharing leading to answers that include non-unitary fractions.

- 3 There are 5 dogs, and 20 bones to be shared between them. How many bones does each dog get?

- 4 There are 15 marbles and 5 children to play with them. How many marbles does each child get?

- 5 There are 3 slabs of chocolate and 12 children. How much chocolate does each child get?

- 6 There is one birthday cake. There are 3 brothers and 1 sister in the family. Share the cake equally between them.

- 7 At a party there are 8 girls. There are 12 hotdogs on a plate. How can you share the hotdogs equally so there are none left? How many are left over?

- 8 A bag has 14 oranges in it. There are 4 children that must share them equally. How many does each child get? How many are left over?
