

Spot the difference

CAPS Statement

Space and shape: Knows and understands the similarities between cubes and rectangular prisms.

Activity 1

Look at the pictures of these 3-D shapes. Write the name of each shape under it and complete the questions below.

How many sides? _____

Name the shape(s) used to make up this shape.

How many sides are exactly the same?

What are all the angles in the shape?

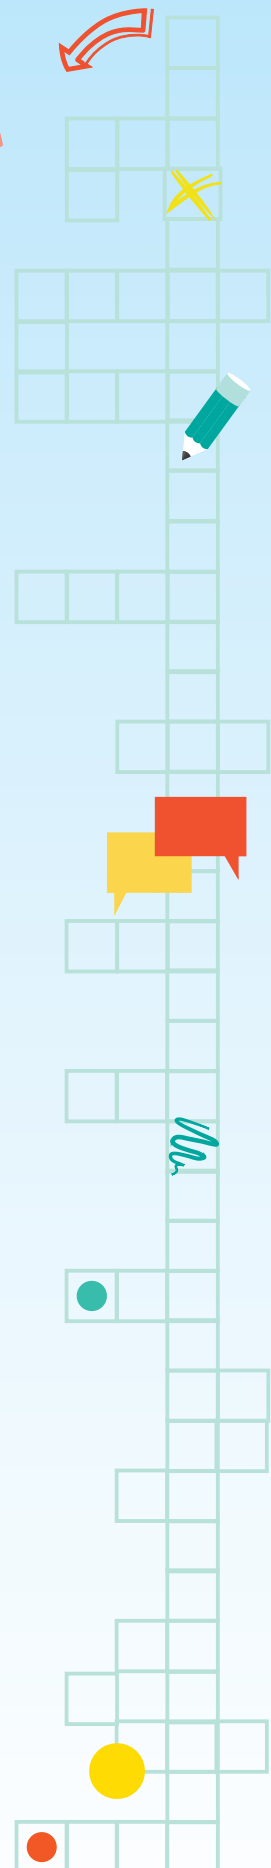

How many sides? _____

Name the shape(s) used to make up this shape.

How many sides are exactly the same?

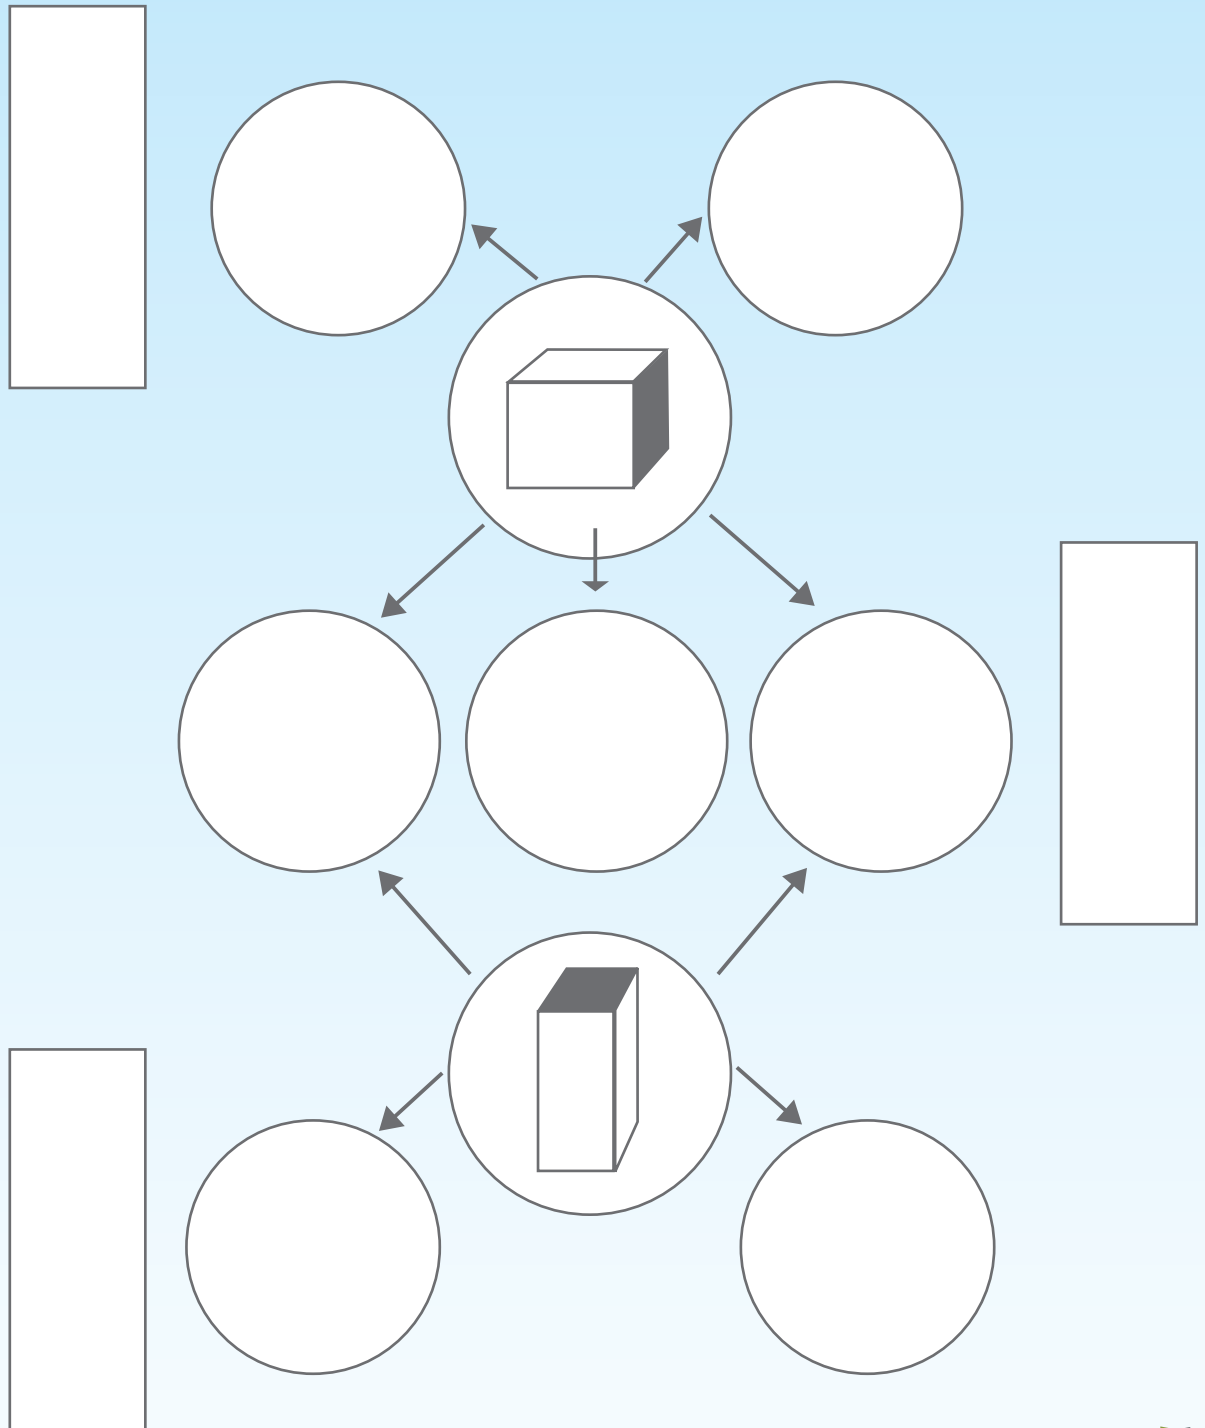

What are all the angles in the shape?

Activity 2

Look at the mind map. Complete the mind map using the information you filled in on the previous activity.

Teacher Tip

Bring examples of 3-D objects to class so learners can explore with them and look for differences between the shapes.
