ENGINEERING GRAPHICS AND DESIGN P2

NOVEMBER 2023

MARKS: 100

TIME: 3 hours

This question paper consists of 6 pages.

Barcode label

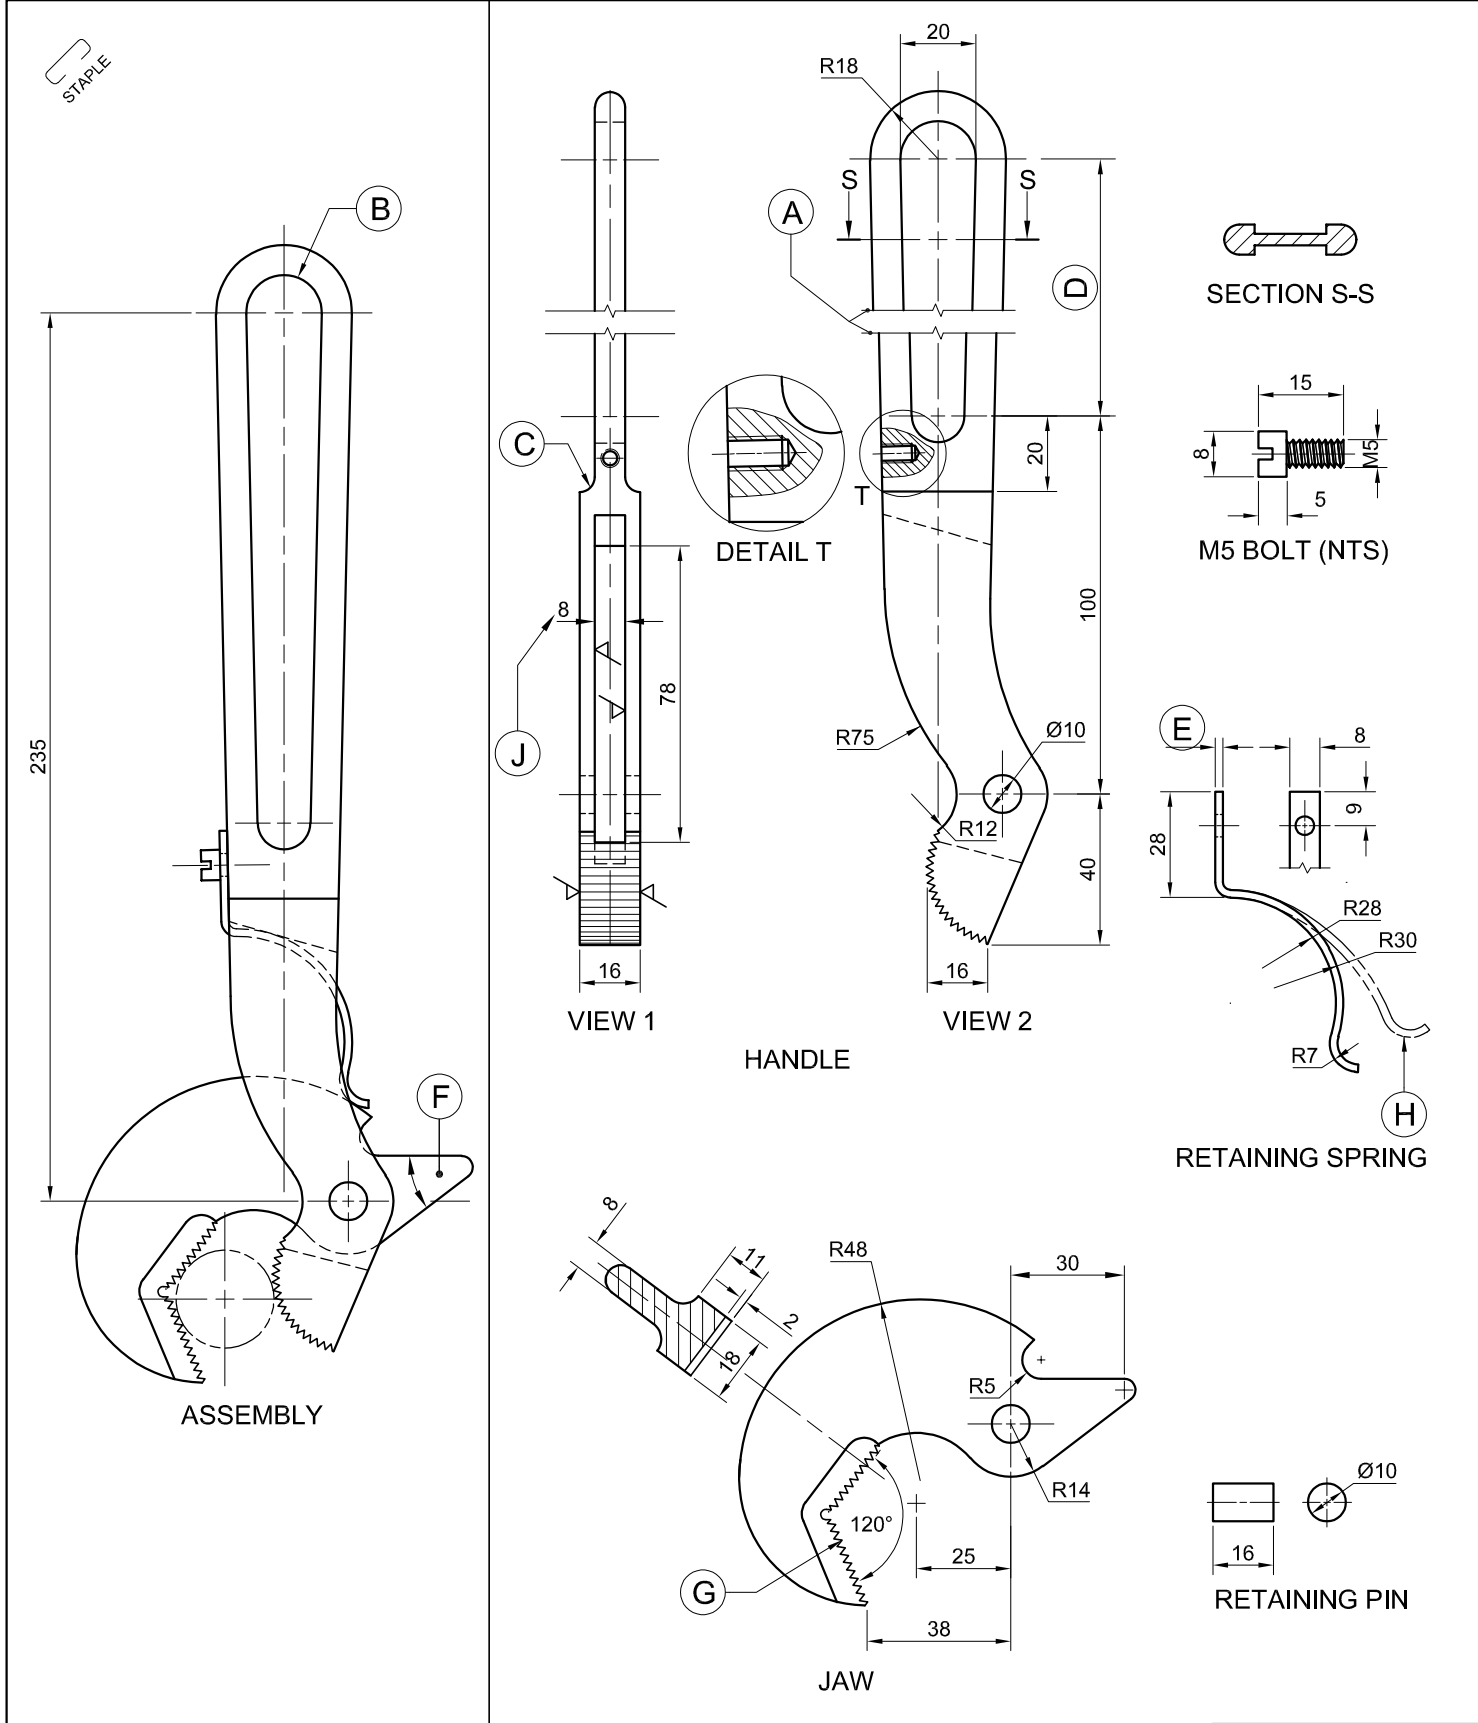

INSTRUCTIONS AND INFORMATION

1. This question paper consists of FOUR questions.
2. Answer ALL the questions.
3. ALL drawings are in third-angle orthographic projection, unless otherwise stated.
4. ALL drawings must be prepared using pencil and instruments, unless otherwise stated.
5. ALL answers must be drawn accurately and neatly.
6. ALL the questions must be answered on the QUESTION PAPER, as instructed.
7. ALL the pages, irrespective of whether the question was attempted or not, must be re-stapled in numerical sequence in the TOP LEFT-HAND CORNER ONLY.
8. Time management is essential in order to complete all the questions.
9. Print your examination number in the block provided on every page.
10. Any details or dimensions not given must be assumed in good proportion.

QUESTION 1: ANALYTICAL (MECHANICAL)

Given:

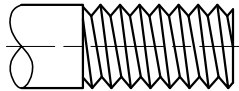

A view of the assembled pipe wrench, third-angle orthographic views of the parts of the pipe wrench, a title block and a table of questions. The drawings are not presented to the indicated scale.

Instructions:

Complete the table below by neatly answering the questions, which refer to the accompanying drawings, the title block and mechanical content. [30]

QUESTIONS		ANSWERS		
1	In which street is the manufacturer situated?	1		
2	What was done by Charles on 16/08/2022?	1		
3	What is the file name?	1		
4	What conventional representation is indicated by the break lines at A?	1		
5	What heating process is used for the tempering?	1		
6	What type of section is SECTION S-S?	1		
7	What type of section is shown in DETAIL T?	1		
8	Determine the complete dimensions at: B: C: D: E:	4		
9	Measure the angle at F.	1		
10	What is the depth of the teeth at G?	1		
11	What does the double-dash chain line at H indicate?	1		
12	How many surfaces on the pipe wrench must be machined?	1		
13	What does the abbreviation NTS stand for?	1		
14	If VIEW 1 is the front view of the handle, what would VIEW 2 be called?	1		
15	How many parts make up the pipe wrench assembly?	1		
16	With reference to the tolerance, determine the minimum and the maximum dimension at J.	2		
17	What is the direction of lay that is indicated by the machining symbol?	1		
18	What does the 0.2 on the machining symbol indicate?	1		
19	In the space below (ANSWER 19), redraw, in neat freehand and to the same size, the given end of a stud as a SANS 10111 conventional representation.	4 1/2		
20	In the space below (ANSWER 20), draw, in neat freehand, the symbol for the projection system used.	3 1/2		
TOTAL		30

ASSESSMENT CRITERIA 2.1					
1	GIVEN	6			
2	CONSTRUCTION	3			
3	POINTS + CURVE	10			
PENALTIES (-)					
SUBTOTAL 2.1		19			

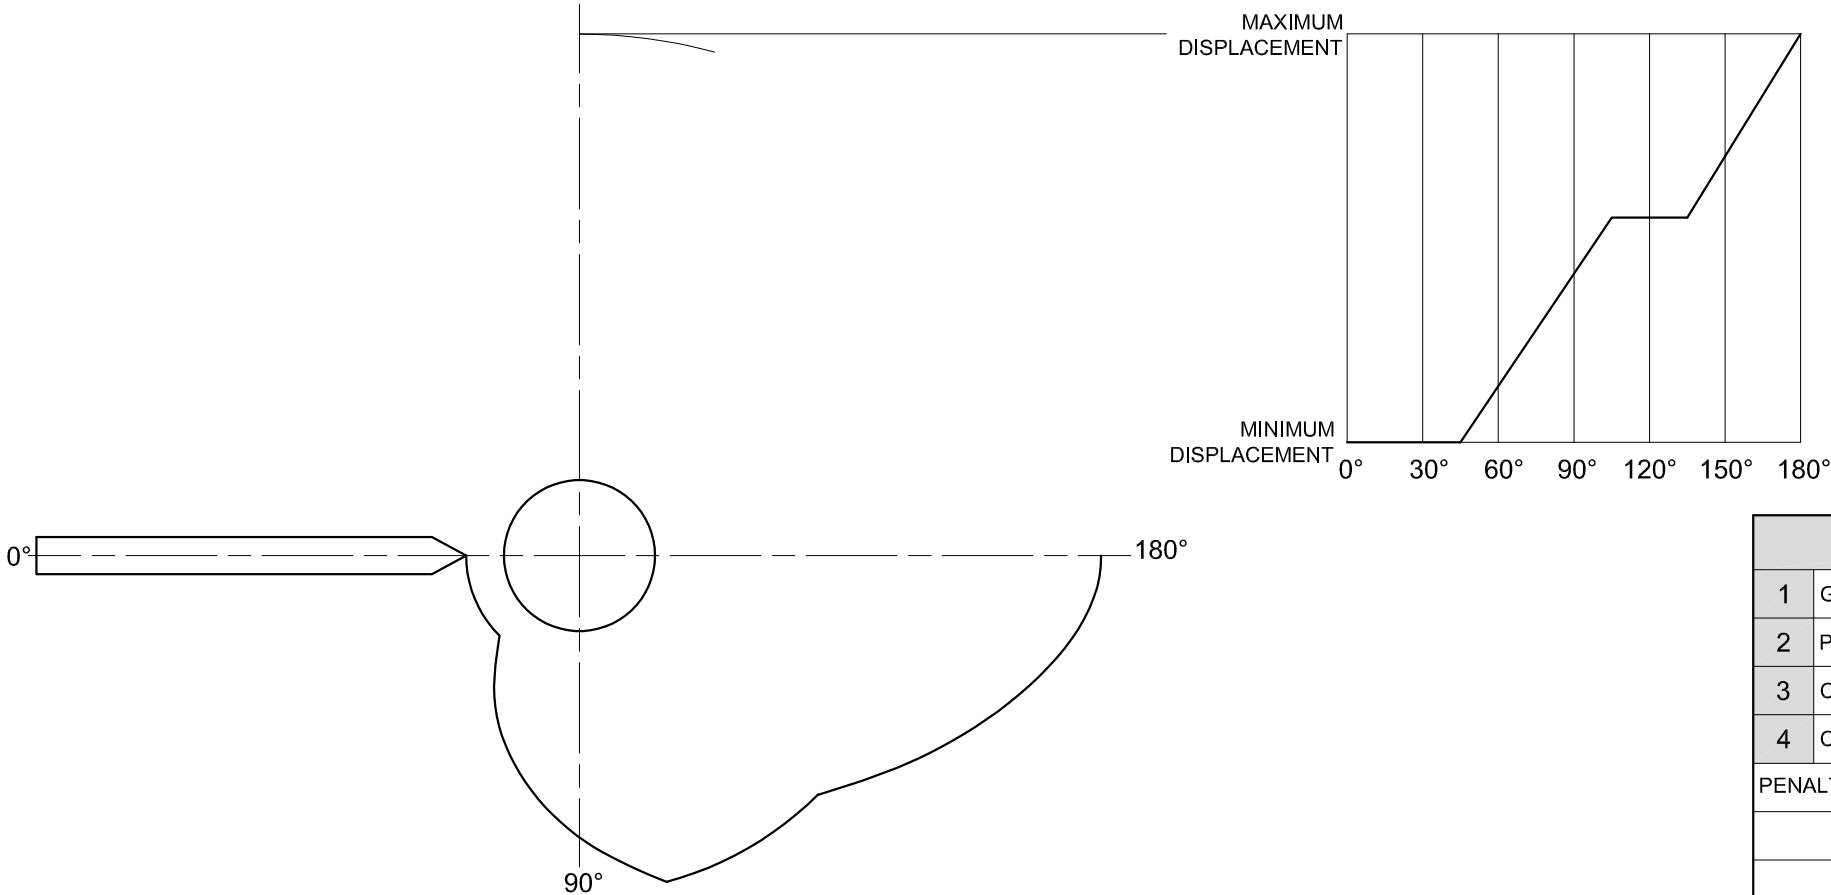

QUESTION 2: LOCI

NOTE: Answer QUESTIONS 2.1 and 2.2.

2.1 MECHANISM

- Given:**
- A schematic drawing of a mechanism consisting of crank OA, sliding rod AB, horizontal groove FG and rod DE in the vertical position
 - The position of centre point O on the drawing sheet
- Specifications and motion:**
- The positions of centre point O and point D are fixed.
 - Sliding rod AB is pin-jointed at A.
 - Guide B slides in groove FG.
 - Rod DE is pin-jointed at D.
 - Rod DE slides through guide B.
 - As crank OA rotates, guide B slides back and forth in groove FG, causing rod DE to oscillate.

- Instructions:**
- Draw, to scale 1 : 1, the given schematic drawing of the mechanism.
 - Trace the loci generated by point C and by point E for ONE complete rotation of crank OA.
 - Show ALL construction. **[19]**

2.2: CAM

- Given:**
- The wedge-shaped follower and the camshaft, as well as the first 180° of the cam profile and the displacement graph in the correct position
- Motion:**
- The cam imparts the following motion to the given follower over the next 180°:
- There is a dwell period for 45°.
 - It moves inwards to the minimum displacement with uniform acceleration and retardation over the next 90°.
 - There is a dwell period over the remainder of the rotation.

- Instructions:**
- Using a rotational scale of 10 mm = 30° and a displacement scale of 1 : 1, complete the displacement graph by adding the required motion.
 - Label the displacement graph and include the rotational scale.
 - Project and complete the cam profile.
 - Indicate the rotation direction with an arrow.
 - Show ALL construction and projection. **[19]**

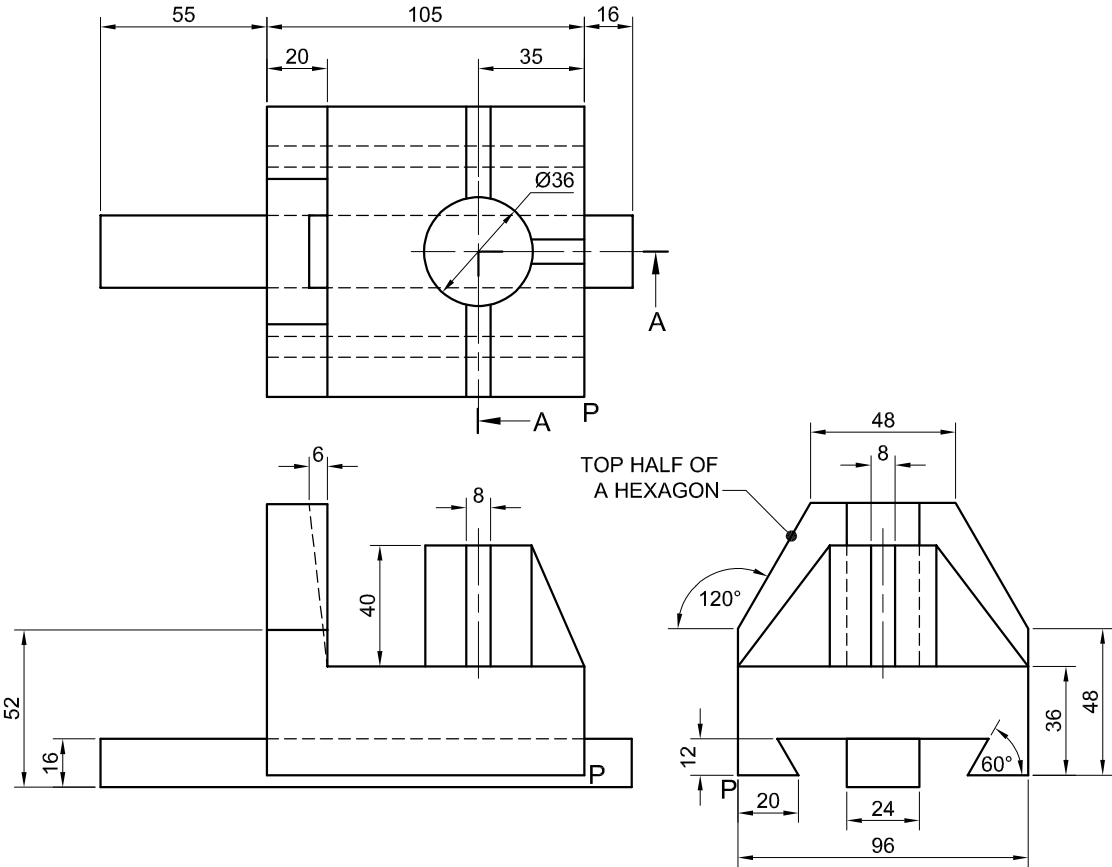

ASSESSMENT CRITERIA 2.2					
1	GRAPH CONSTRUCTION	5			
2	PLOTTING GRAPH	5 1/2			
3	CAM CONSTRUCTION	3			
4	CAM + CURVE QUALITY	5 1/2			
PENALTIES (-)					
SUBTOTAL 2.2		19			
SUBTOTAL 2.1		19			
TOTAL		38			

QUESTION 3: ISOMETRIC DRAWING

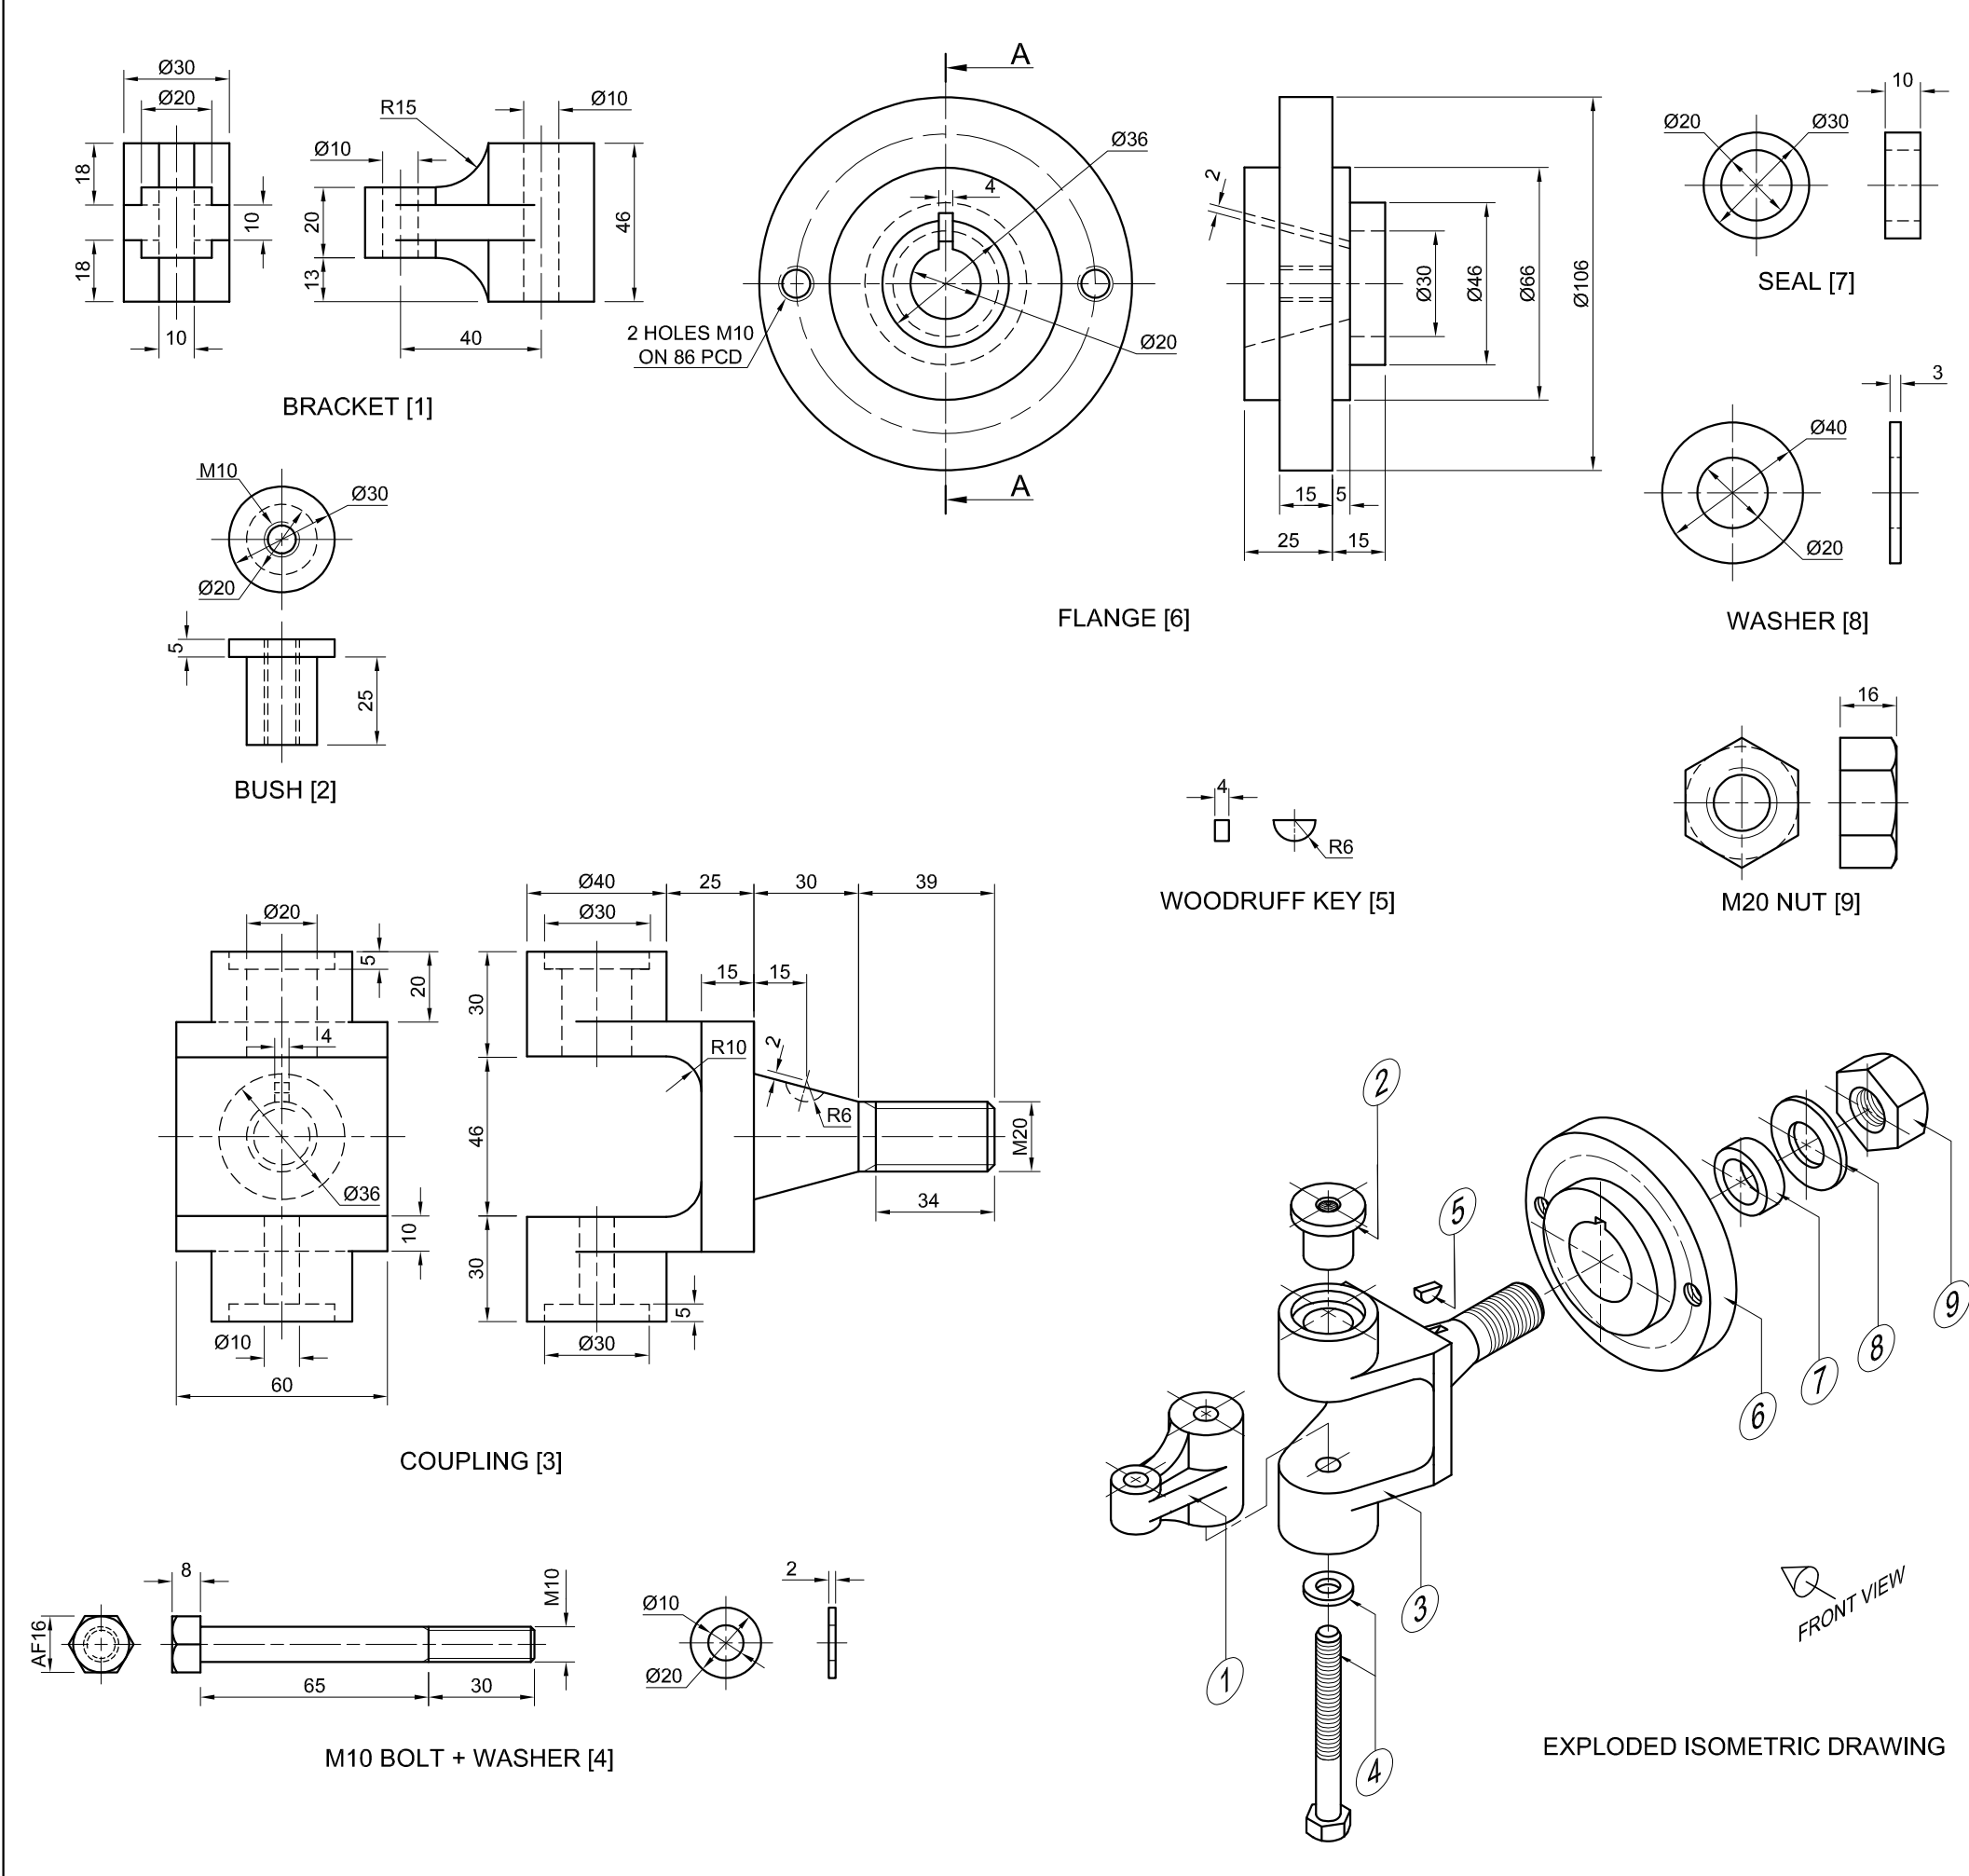

- Given:**
- The front view, top view and right view of a SLIDING GUIDE casting
 - The position of point P on the drawing sheet

- Instructions:**
- Using scale 1 : 1, convert the orthographic views of the SLIDING GUIDE casting into a sectional isometric drawing on cutting plane A-A.
- Make P the lowest point of the drawing.
 - Show ALL construction.
 - NO hidden detail is required.
- [40]

EXAMINATION NUMBER				4

QUESTION 4: MECHANICAL ASSEMBLY

- Given:**
- The exploded isometric drawing of the parts of a coupling assembly, showing the position of each part relative to all the others
 - Orthographic views of each part of the coupling assembly

- Instructions:**
- Answer this question on page 6.
 - Draw, to scale 1 : 1 and in third-angle orthographic projection, the following views of the assembled parts of the coupling assembly:
 - 4.1 **A sectional front view** on cutting plane A-A as seen from the direction of the arrow on the exploded isometric drawing. The cutting plane is shown on the left view of the flange (part 6).
 - 4.2 **The left view**

- NOTE:**
- Planning is essential.
 - The drawing must comply with the *SANS 10111* guidelines.
 - The convention of symmetry may NOT be applied.
 - Show **THREE** faces of the M20 NUT (part 9) on the sectional front view.
 - Show **TWO** faces of the M10 BOLT (part 4) on the sectional front view.
 - NO hidden detail is required.
